

ALAA EDDINE ROUCADI

AI Delivery Lead & Agentic Operating Model Consultant | SAFe/LeSS Delivery & Governance

Nice, France (Open to Remote Europe/EMEA) • +33 06-32-76-87-64 • alaaeddineroucadi@gmail.com • linkedin.com/in/alaeddineroucadi

PROFESSIONAL SUMMARY

AI Delivery Lead and Agile Coach with 10+ years bridging product delivery, scaled-agile operating models, and hands-on AI-native SDLC transformation. Currently directing agentic capability rollout inside a regulated Banking AI Center of Excellence — coaching squads on Atlassian Rovo agent deployment across Jira workflows, governing responsible Claude Code adoption, building Azure AI Foundry workflows, and classifying AI use cases against EU AI Act risk tiers. Proven track record scaling delivery across multi-squad divisions (SAFe, LeSS, Spotify Model) in regulated enterprise environments, translating emerging AI capabilities into governed, high-impact software without overstating technical claims or unverified tools.

WORK EXPERIENCE

Wemanity (Enterprise Banking Mandate)

Remote | Sep 2024 – Present

AI Delivery Coach & Consultant — Agentic SDLC Lead

- **Implemented Atlassian Rovo AI Agents across the Jira SDLC**, deploying task-specific agents for Definition-of-Ready compliance scoring, missing-acceptance-criteria detection, and automated gate checks at workflow transitions (e.g., verifying open PRs and test-environment readiness before tickets move to *Ready for Test*) — removing manual gatekeeping and cutting sprint management overhead by 30%.
- **Deployed Rovo Agents as an AI co-pilot for Product Owners**, assisting backlog refinement, acceptance-criteria drafting, and story-writing — reducing refinement cycle time and raising story quality entering sprint planning.
- **Coached and governed engineering squads on responsible Claude Code adoption**, establishing usage guardrails — incremental changes, independent code review separate from the authoring agent, and mandatory human sign-off — specifically to prevent misuse and unreviewed risk among junior engineers.
- **Evaluated and prioritized agentic use cases**, focusing development exclusively on high-impact SDLC bottlenecks and recommending against automation where it added complexity without measurable delivery benefit.
- **Directed delivery strategy for 3 AI product lines** (fraud detection ML, financial forecasting, GenAI sales copilot), aligning squad cadence and backlog structure with enterprise risk and governance requirements.
- **Facilitated EU AI Act Risk Governance workshops**, classifying model use cases against EU AI Act risk tiers and establishing release-gate criteria for data privacy, model bias, security, and human-in-the-loop oversight.
- **Directed AI adoption and change management across 7 squads (~50 engineers and POs)**, running hands-on workshops, live demos, and prompt-engineering training sessions to drive workflow integration.

Environment: Agentic Workflow Governance, Azure AI Foundry, Atlassian Rovo Platform, Claude Code, EU AI Act Governance, GenAI, Jira Cloud Administration.

Wemanity (Enterprise Banking Mandate)

Remote | Dec 2021 – Sep 2024

Agile Delivery Lead — Multi-Tribe Operating Model

- **Led Agile-at-scale operating model transformation across 2 banking tribes** (Data & Digital Enablers Tribe: Datalake, Data Warehouse, RPA; Supply Chain Finance Tribe: Confirming & Factoring), spanning **7 squads (~50 engineers)**, redesigning delivery cadence and governance (PI Planning, Increment Reviews, Inspect & Adapt) to lift release predictability by 25%.
- **Designed and shipped an internal portfolio-governance tool (Alignify)**, architecting the Jira Cloud backbone for Agile@Scale (SAFe + Spotify Model) to give leadership real-time cross-tribe dependency visibility, eliminating 4 hours/week of manual reporting.
- **Governed data lake accessibility and pipeline standards** underpinning centralized data warehousing, enabling 5 downstream feature teams to build on clean, reliable data for analytics.
- **Scaled shared engineering practice maturity org-wide**, building Communities of Practice and coaching programs (Scrum, Kanban, OKRs) that standardized delivery discipline across both tribes.

Environment: Scaled Agile (SAFe + Spotify Model), Data Lake & Warehouse, RPA, Supply Chain Finance, Jira Cloud Administration, Alignify, Confluence, Miro.

Axel Springer

Paris, France | Sep 2019 – Dec 2021

Delivery Lead & Agile Transformation Consultant

- **Directed architectural transformation from monolith to microservices on AWS** across 2 engineering teams — zero critical incidents, 40% downtime reduction — establishing delivery foundation for B2B real estate platform used by **10,000+ property professionals**.
- **Diagnosed and resolved systemic delivery bottlenecks** by implementing Spotify Squads Health Check across 3 squads, resolving 6 recurring blockers and improving team self-management scores by 20%.
- **Instituted predictability discipline across teams** (velocity, sprint burndown), raising sprint commitment accuracy from 60% to 82% over 10 consecutive sprints.
- **Redesigned cross-functional quality practice** via "3 Amigos" (Dev/QA/Product) model, cutting defect leakage to production by 25%.

Environment: Scrum of Scrums, BDD, TDD, XP, Clean Architecture, .NET Core, C#, Web API, Microservices, AWS, Docker, TeamCity, Octopus.

Agile Delivery Lead (LeSS)

- Directed multi-team delivery alignment by facilitating Large-Scale Scrum (LeSS) across 3 teams building a B2C rent-guarantee platform, driving a 20% improvement in cross-team alignment.
- Built technical capability at scale, coaching 8 engineers on TDD and Hexagonal Architecture, contributing to a 25% reduction in production defects.

Environment: LeSS, TDD, XP, Hexagonal Architecture, .NET Core, C#, Web API, Vue.js, JavaScript, Jenkins, Kibana, Docker.

Amadeus & Capgemini

Delivery Lead & Software Engineering Lead

- Amadeus (2016–2018): Led delivery for 9-person squad building Property Management System, sustaining 86% on-time delivery across 60+ sprints. Facilitated Scrum of Scrums across 4 teams, cutting lead time by 25%.
- Capgemini (2013–2015): Prepared commercial proposals, technical RFP responses, and commercial pitch decks to build, structure, and sell Capgemini consulting and software engineering service offerings. Led delivery & CI/CD transformation for 4-person engineering team, cutting release cycle time by 40%.

SKILLS & ENVIRONMENT

Agentic AI & Product	Atlassian Rovo Platform, Claude Code Co-Pilots, SDLC Automation Product Ownership, Backlog Management, Agentic Workflow Governance, AI Guardrails
AI Governance & Compliance	EU AI Act Risk Classification (Applied Practice), Responsible AI & Human-in-the-Loop Verification, AI Product Viability & Adoption Metrics
Agile at Scale & Delivery	SAFe, Spotify Model, LeSS, Scrum of Scrums, BDD, TDD, DDD, Software Craftsmanship, CI/CD, Mob Programming, OKRs
Commercial & Offerings	Commercial Proposals & RFP Responses (Capgemini Offering Development), Stakeholder Alignment, Vendor & Partner Coordination
Technical Stack	Azure OpenAI, Azure AI Foundry, AWS (EC2, S3, Lambda), .NET Core, C#, Web API, REST APIs, Python, Vue.js, HTML5, CSS3, JavaScript, Docker
Tools & Platforms	Jira Cloud Administration, Alignify (Custom Jira App), Confluence, Miro, Planview, TeamCity, Octopus, Jenkins, Bitbucket, GitLab

CERTIFICATIONS & EDUCATION

Certifications: Certified Professional – Agile Coaching (ICAgile) • Certified Professional – Agile Team Facilitation (ICAgile) • Certified OKR Foundation (OKR Institute) • AI for Product Management (Mind The Product) • Generative AI for Business (Microsoft Azure OpenAI) • Pursuing: AI Governance Professional (AIGP, IAPP)

Education: Master 2 IT Management (IAE Lyon, 2013) • Engineering Degree in Software Engineering (INSA Toulouse / ENSA Marrakech, 2012)

Languages: French & Arabic (Bilingual), English (Fluent - TOEIC / Edinburgh Cert)
