

ALAA EDDINE ROUCADI

Senior AI Product & Delivery Manager / AI Operating Model Architect | Enterprise Transformation & Governance

PROFESSIONAL SUMMARY

Senior senior / lead / executive director tier (10+ yoe) leader with extensive track record governing large-scale delivery, modern operating models, and engineering execution. Brings verified enterprise telemetry: Banking CoE Scale (Governed 3 banking tribes and 7 squads (~50 engineers/POs) across 3 AI product streams.); Agentic SDLC & Tooling (Shipped Atlassian Rovo AI Agents and Claude Code with Spec-Driven Development (SDD) guardrails.); Alignify Custom Jira App (Created Alignify, a custom internal Jira portfolio dependency application for cross-tribe delivery.). Specialized in driving predictable delivery across multi-team ecosystems, enforcing engineering guardrails, and aligning technical architecture directly with executive commercial objectives.

CORE COMPETENCIES & VALUE PROPOSITION

- 🏢: Multi-tribe Agile-at-scale governance (SAFe, LeSS, Spotify Model), joint Program Increment (PI) planning, Value Stream Mapping, and continuous delivery maturity coaching.
- 🛡️: Guardrail frameworks for agentic coding tools (Claude Code), enforcing Spec-Driven Development (SDD), mandatory peer review disciplines, automated test gates, and EU AI Act risk tiering.
- 🔄: Custom Jira governance architecture (Alignify) providing real-time cross-tribe dependency mapping, synchronization cadence, flow metrics, and delivery forecasting.
- 🚀: Rollout and operational integration of Atlassian Rovo agents and agentic development assistants across Jira workflows, Definition-of-Ready (DoR) gates, and backlog refinement.

WORK EXPERIENCE

Wemanity	Remote (Enterprise Banking Client Mandate)
Wemanity	Remote (Enterprise Banking Client Mandate)
AI-Driven Agile Coach & Consultant	AI Excellence Center
• ('Data & IA Tribe', 'Digital Enablers Tribe', 'Supply Chain Finance Tribe'), supporting across (fraud detection ML, financial forecasting, and GenAI sales copilot). • , assisting in backlog refinement, acceptance criteria structuring, and user story elaboration to accelerate refinement cycle times and raise story quality entering sprint planning. • , enforcing Spec-Driven Development (SDD), small incremental pull requests, mandatory human peer reviews, and automated test checkpoints to prevent defect leakage and unreviewed AI-generated risk. • across the engineering lifecycle, focusing automation efforts strictly on high-impact delivery bottlenecks while advising leadership against automating low-value workflows that added unnecessary complexity. • across the Jira SDLC, deploying task-specific agents for Definition-of-Ready compliance scoring, missing acceptance criteria detection, and automated ticket validation checkpoints — eliminating manual gatekeeping bottlenecks and streamlining sprint preparation. • , classifying model use cases against regulatory risk tiers and establishing operational release-gate criteria for data privacy, model bias, security, and human-in-the-loop verification before production rollout. • , eliminating manual cross-tribe status reporting overhead while providing leadership with real-time dependency visibility, synchronization cadence, and delivery forecasting.	
Wemanity	Remote (Enterprise Banking Client Mandate)
Agile Transformation Consultant	Senior Agile Coach
• (Data & Digital Enablers Tribe: Data Lake, Data Warehouse, RPA, Notification Engines; Supply Chain Finance Tribe: Confirming & Factoring), redesigning cross-squad cadence and multi-team governance through joint PI Planning, Increment Reviews, and Inspect & Adapt ceremonies. • , establishing internal Communities of Practice and delivering coaching programs on modern Agile delivery, Kanban flow management, OKRs, and delivery predictability. • , structuring portfolio hierarchy, epic roadmaps, and cross-team dependency mapping across 7 squads. • underpinning centralized data warehousing, enabling downstream feature teams to build reporting universes and analytics on clean, compliant, and governed data models.	
Axel Springer (SeLogger)	Paris, France
Axel Springer (SeLogger)	Paris, France
Agile Delivery Lead / Scrum Master	September 2019 – December 2021
• , supporting without business disruption to live rental operations across . • (sprint burndown, cycle time), steadily improving commitment reliability and release forecasting over successive sprints. • , collaborating with tech leads and Product Owners to ensure resilient infrastructure and high platform availability. • by implementing the Spotify Squads Health Check model across squads, removing recurring dependencies and materially improving team autonomy and self-management. • via a "3 Amigos" (Dev / QA / Product) model, substantially reducing defect leakage into production.	
SwissCaution	Nyon, Switzerland
SwissCaution	Nyon, Switzerland
Scrum Master & Agile Coach	June 2018 – September 2019
• by facilitating Large-Scale Scrum (LeSS) across building a B2C rent-guarantee platform (premium calculation, promotional campaigns, commission management), streamlining backlog refinement and cross-team dependencies. • by facilitating core Scrum ceremonies (Sprint Planning, Daily Standups, Sprint Reviews, Retrospectives). • , instilling clean code craftsmanship, automated testing rigor, and lowering post-release regression rates. • through Event Storming and Mob Programming workshops engaging developers, QA, and business stakeholders.	
Amadeus	Sophia Antipolis, France
Amadeus	Sophia Antipolis, France
Scrum Master & Technical Delivery Lead	January 2016 – June 2016
• building Property Management System (PMS) integrations, CRS connectivity, brand configurations, and vendor profiles. • , resolving cross-system dependencies, unblocking integration bottlenecks, and reducing delivery lead time. • , ensuring technical feasibility and timely delivery across major hospitality feature releases.	
Capgemini	Sophia Antipolis, France
Capgemini	Sophia Antipolis, France
Software Engineering Lead & IT Consultant	October 2013 – December 2015
• , designing and implementing automated CI/CD pipelines and architectural modernization for a facility management intervention system (mobile app + admin portal). • , structuring architectural scoping and delivery estimates for enterprise client proposals. • for field technicians and administrators, while providing hands-on training on TDD and continuous integration practices.	

CERTIFICATIONS & EXECUTIVE EDUCATION

Professional Certifications (Obtained)

-  — AI for Product Management
-  — Certified Professional in Agile Coaching (ICP-ACC)
-  — Certified Professional in Agile Team Facilitation (ICP-ATF)
-  — Facilitating Growth in Agile Teams
-  — Certified OKR Foundation
-  — Generative AI for Business with Microsoft Azure OpenAI

Executive Education & AI Governance (Planned / In Progress)

-  — RNCP 37630 Bloc 2: Management de Projet & Transformation *(Planned)*
-  — Certified Artificial Intelligence Governance Professional (AIGP) *(In Progress)*
-  — FinOps Certified Practitioner (FOCP) *(In Progress)*

EDUCATION

-  | IAE Lyon | 2012–2013
-  | INSA Toulouse / ENSA Marrakech | 2007–2012

TECHNICAL & TOOLING ECOSYSTEM

- : SAFE, LeSS, Spotify Model, Scrum of Scrums, Scrum, Kanban, XP, OKRs, Value Stream Mapping, BDD, TDD, Clean Architecture, Hexagonal Architecture
- : Atlassian Rovo Platform, Claude Code Co-Pilots, Spec-Driven Development (SDD), Prompt Engineering, EU AI Act Risk Governance, Responsible AI Guardrails, Azure AI Foundry
- : .NET Core, C#, Web API, REST APIs, Python, Vue.js, JavaScript, HTML5, CSS3, AWS (EC2, S3, Lambda), Docker, CI/CD Automation
- : Jira Cloud Administration, Alignify (Custom Jira App), Confluence, Miro, Planview, TeamCity, Octopus, Jenkins, Bitbucket, GitLab

LANGUAGES & COMMUNITY

- : Agile Playground Meetups; Coding Dojo Organizer (Sophia Antipolis, 2014–2019); IAE Lyon Alumni Network; Football (Jeux de Sophia League), Swimming, Ping Pong
- : French (Bilingual / Native), Arabic (Bilingual / Native), English (Fluent - TOEIC & Edinburgh Business English Certified)
