

ALAA EDDINE ROUCADI

Senior AI Product & Delivery Manager / AI Operating Model Architect | Enterprise Transformation & Governance

PROFESSIONAL SUMMARY

Senior senior / lead / executive director tier (10+ yoe) leader with extensive track record governing large-scale delivery, modern operating models, and engineering execution. Brings verified enterprise telemetry: Banking CoE Scale (Governed 3 banking tribes and 7 squads (~50 engineers/POs) across 3 AI product streams.); Agentic SDLC & Tooling (Shipped Atlassian Rovo AI Agents and Claude Code with Spec-Driven Development (SDD) guardrails.); Alignify Custom Jira App (Created Alignify, a custom internal Jira portfolio dependency application for cross-tribe delivery.). Specialized in driving predictable delivery across multi-team ecosystems, enforcing engineering guardrails, and aligning technical architecture directly with executive commercial objectives.

CORE COMPETENCIES & VALUE PROPOSITION

- 🏗️: Guardrail frameworks for agentic coding tools (Claude Code), enforcing Spec-Driven Development (SDD), mandatory peer review disciplines, automated test gates, and EU AI Act risk tiering.
- 🔄: Custom Jira governance architecture (Alignify) providing real-time cross-tribe dependency mapping, synchronization cadence, flow metrics, and delivery forecasting.
- 📊: Multi-tribe Agile-at-scale governance (SAFe, LeSS, Spotify Model), joint Program Increment (PI) planning, Value Stream Mapping, and continuous delivery maturity coaching.
- 🚀: Rollout and operational integration of Atlassian Rovo agents and agentic development assistants across Jira workflows, Definition-of-Ready (DoR) gates, and backlog refinement.

WORK EXPERIENCE

Wemanimy	Remote (Enterprise Banking Client Mandate)
Wemanimy	Remote (Enterprise Banking Client Mandate)
AI-Driven Agile Coach & Consultant	AI Excellence Center
• (‘Data & IA Tribe’, ‘Digital Enablers Tribe’, ‘Supply Chain Finance Tribe’), supporting across (fraud detection ML, financial forecasting, and GenAI sales copilot). • , classifying model use cases against regulatory risk tiers and establishing operational release-gate criteria for data privacy, model bias, security, and human-in-the-loop verification before production rollout. • , assisting in backlog refinement, acceptance criteria structuring, and user story elaboration to accelerate refinement cycle times and raise story quality entering sprint planning. • , enforcing Spec-Driven Development (SDD), small incremental pull requests, mandatory human peer reviews, and automated test checkpoints to prevent defect leakage and unreviewed AI-generated risk. • across the engineering lifecycle, focusing automation efforts strictly on high-impact delivery bottlenecks while advising leadership against automating low-value workflows that added unnecessary complexity. • , eliminating manual cross-tribe status reporting overhead while providing leadership with real-time dependency visibility, synchronization cadence, and delivery forecasting. • across the Jira SDLC, deploying task-specific agents for Definition-of-Ready compliance scoring, missing acceptance criteria detection, and automated ticket validation checkpoints — eliminating manual gatekeeping bottlenecks and streamlining sprint preparation.	
Wemanimy	Remote (Enterprise Banking Client Mandate)
Agile Transformation Consultant	Senior Agile Coach
• , establishing internal Communities of Practice and delivering coaching programs on modern Agile delivery, Kanban flow management, OKRs, and delivery predictability. • (Data & Digital Enablers Tribe: Data Lake, Data Warehouse, RPA, Notification Engines; Supply Chain Finance Tribe: Confirming & Factoring), redesigning cross-squad cadence and multi-team governance through joint PI Planning, Increment Reviews, and Inspect & Adapt ceremonies. • underpinning centralized data warehousing, enabling downstream feature teams to build reporting universes and analytics on clean, compliant, and governed data models. • , structuring portfolio hierarchy, epic roadmaps, and cross-team dependency mapping across 7 squads.	
Axel Springer (SeLogger)	Paris, France
Axel Springer (SeLogger)	Paris, France
Agile Delivery Lead / Scrum Master	September 2019 – December 2021
• , supporting without business disruption to live rental operations across . • , collaborating with tech leads and Product Owners to ensure resilient infrastructure and high platform availability. • via a "3 Amigos" (Dev / QA / Product) model, substantially reducing defect leakage into production. • by implementing the Spotify Squads Health Check model across squads, removing recurring dependencies and materially improving team autonomy and self-management. • (sprint burndown, cycle time), steadily improving commitment reliability and release forecasting over successive sprints.	
SwissCaution	Nyon, Switzerland
SwissCaution	Nyon, Switzerland
Scrum Master & Agile Coach	June 2018 – September 2019
• by facilitating Large-Scale Scrum (LeSS) across building a B2C rent-guarantee platform (premium calculation, promotional campaigns, commission management), streamlining backlog refinement and cross-team dependencies. • , instilling clean code craftsmanship, automated testing rigor, and lowering post-release regression rates. • through Event Storming and Mob Programming workshops engaging developers, QA, and business stakeholders. • by facilitating core Scrum ceremonies (Sprint Planning, Daily Standups, Sprint Reviews, Retrospectives).	
Amadeus	Sophia Antipolis, France
Amadeus	Sophia Antipolis, France
Scrum Master & Technical Delivery Lead	January 2016 – June 2016
• building Property Management System (PMS) integrations, CRS connectivity, brand configurations, and vendor profiles. • , resolving cross-system dependencies, unblocking integration bottlenecks, and reducing delivery lead time. • , ensuring technical feasibility and timely delivery across major hospitality feature releases.	
Capgemini	Sophia Antipolis, France
Capgemini	Sophia Antipolis, France
Software Engineering Lead & IT Consultant	October 2013 – December 2015
• , structuring architectural scoping and delivery estimates for enterprise client proposals. • , designing and implementing automated CI/CD pipelines and architectural modernization for a facility management intervention system (mobile app + admin portal). • for field technicians and administrators, while providing hands-on training on TDD and continuous integration practices.	

CERTIFICATIONS & EXECUTIVE EDUCATION

Professional Certifications (Obtained)

-  — Generative AI for Business with Microsoft Azure OpenAI
-  — AI for Product Management
-  — Certified Professional in Agile Coaching (ICP-ACC)
-  — Certified Professional in Agile Team Facilitation (ICP-ATF)
-  — Facilitating Growth in Agile Teams
-  — Certified OKR Foundation

Executive Education & AI Governance (Planned / In Progress)

-  — RNCP 37630 Bloc 2: Management de Projet & Transformation *(Planned)*
-  — Certified Artificial Intelligence Governance Professional (AIGP) *(In Progress)*
-  — FinOps Certified Practitioner (FOCP) *(In Progress)*

EDUCATION

-  | IAE Lyon | 2012–2013
-  | INSA Toulouse / ENSA Marrakech | 2007–2012

TECHNICAL & TOOLING ECOSYSTEM

- : Atlassian Rovo Platform, Claude Code Co-Pilots, Spec-Driven Development (SDD), Prompt Engineering, EU AI Act Risk Governance, Responsible AI Guardrails, Azure AI Foundry
- : .NET Core, C#, Web API, REST APIs, Python, Vue.js, JavaScript, HTML5, CSS3, AWS (EC2, S3, Lambda), Docker, CI/CD Automation
- : Jira Cloud Administration, Alignify (Custom Jira App), Confluence, Miro, Planview, TeamCity, Octopus, Jenkins, Bitbucket, GitLab
- : SAFe, LeSS, Spotify Model, Scrum of Scrums, Scrum, Kanban, XP, OKRs, Value Stream Mapping, BDD, TDD, Clean Architecture, Hexagonal Architecture

LANGUAGES & COMMUNITY

- : French (Bilingual / Native), Arabic (Bilingual / Native), English (Fluent - TOEIC & Edinburgh Business English Certified)
- : Agile Playground Meetups; Coding Dojo Organizer (Sophia Antipolis, 2014–2019); IAE Lyon Alumni Network; Football (Jeux de Sophia League), Swimming, Ping Pong
