

ALAA EDDINE ROUCADI

Senior AI Product & Delivery Manager / AI Operating Model Architect | Enterprise Transformation & Governance

PROFESSIONAL SUMMARY

Senior senior / lead / executive director tier (10+ yoe) leader with extensive track record governing large-scale delivery, modern operating models, and engineering execution. Brings verified enterprise telemetry: Banking CoE Scale (Governed 3 banking tribes and 7 squads (~50 engineers/POs) across 3 AI product streams.); Agentic SDLC & Tooling (Shipped Atlassian Rovo AI Agents and Claude Code with Spec-Driven Development (SDD) guardrails.); Alignify Custom Jira App (Created Alignify, a custom internal Jira portfolio dependency application for cross-tribe delivery.). Specialized in driving predictable delivery across multi-team ecosystems, enforcing engineering guardrails, and aligning technical architecture directly with executive commercial objectives.

CORE COMPETENCIES & VALUE PROPOSITION

- 🏢: Multi-tribe Agile-at-scale governance (SAFe, LeSS, Spotify Model), joint Program Increment (PI) planning, Value Stream Mapping, and continuous delivery maturity coaching.
- 🏢: Rollout and operational integration of Atlassian Rovo agents and agentic development assistants across Jira workflows, Definition-of-Ready (DoR) gates, and backlog refinement.
- 🏢: Guardrail frameworks for agentic coding tools (Claude Code), enforcing Spec-Driven Development (SDD), mandatory peer review disciplines, automated test gates, and EU AI Act risk tiering.
- 🏢: Custom Jira governance architecture (Alignify) providing real-time cross-tribe dependency mapping, synchronization cadence, flow metrics, and delivery forecasting.

WORK EXPERIENCE

Wemanity

Remote (Enterprise Banking Client Mandate)

Wemanity

Remote (Enterprise Banking Client Mandate)

AI-Driven Agile Coach & Consultant

AI Excellence Center

- **AI**, enforcing Spec-Driven Development (SDD), small incremental pull requests, mandatory human peer reviews, and automated test checkpoints to prevent defect leakage and unreviewed AI-generated risk.
- **AI** ('Data & IA Tribe', 'Digital Enablers Tribe', 'Supply Chain Finance Tribe'), supporting **AI** across **AI** (fraud detection ML, financial forecasting, and GenAI sales copilot).
- **AI** across the engineering lifecycle, focusing automation efforts strictly on high-impact delivery bottlenecks while advising leadership against automating low-value workflows that added unnecessary complexity.
- **AI**, classifying model use cases against regulatory risk tiers and establishing operational release-gate criteria for data privacy, model bias, security, and human-in-the-loop verification before production rollout.
- **AI**, assisting in backlog refinement, acceptance criteria structuring, and user story elaboration to accelerate refinement cycle times and raise story quality entering sprint planning.
- **AI**, eliminating manual cross-tribe status reporting overhead while providing leadership with real-time dependency visibility, synchronization cadence, and delivery forecasting.
- **AI** across the Jira SDLC, deploying task-specific agents for Definition-of-Ready compliance scoring, missing acceptance criteria detection, and automated ticket validation checkpoints — eliminating manual gatekeeping bottlenecks and streamlining sprint preparation.

Wemanity

Remote (Enterprise Banking Client Mandate)

Agile Transformation Consultant

Senior Agile Coach

- **AI** (Data & Digital Enablers Tribe: Data Lake, Data Warehouse, RPA, Notification Engines; Supply Chain Finance Tribe: Confirming & Factoring), redesigning cross-squad cadence and multi-team governance through joint PI Planning, Increment Reviews, and Inspect & Adapt ceremonies.
- **AI**, establishing internal Communities of Practice and delivering coaching programs on modern Agile delivery, Kanban flow management, OKRs, and delivery predictability.
- **AI**, structuring portfolio hierarchy, epic roadmaps, and cross-team dependency mapping across 7 squads.
- **AI** underpinning centralized data warehousing, enabling downstream feature teams to build reporting universes and analytics on clean, compliant, and governed data models.

Axel Springer (SeLogger)

Paris, France

Axel Springer (SeLogger)

Paris, France

Agile Delivery Lead / Scrum Master

September 2019 – December 2021

- **AI**, supporting **AI** without business disruption to live rental operations across **AI**.
- **AI** via a "3 Amigos" (Dev / QA / Product) model, substantially reducing defect leakage into production.
- **AI**, collaborating with tech leads and Product Owners to ensure resilient infrastructure and high platform availability.
- **AI** (sprint burndown, cycle time), steadily improving commitment reliability and release forecasting over successive sprints.
- **AI** by implementing the Spotify Squads Health Check model across squads, removing recurring dependencies and materially improving team autonomy and self-management.

SwissCaution

Nyon, Switzerland

SwissCaution

Nyon, Switzerland

Scrum Master & Agile Coach

June 2018 – September 2019

- **AI** by facilitating Large-Scale Scrum (LeSS) across **AI** building a B2C rent-guarantee platform (premium calculation, promotional campaigns, commission management), streamlining backlog refinement and cross-team dependencies.
- **AI** through Event Storming and Mob Programming workshops engaging developers, QA, and business stakeholders.
- **AI**, instilling clean code craftsmanship, automated testing rigor, and lowering post-release regression rates.
- **AI** by facilitating core Scrum ceremonies (Sprint Planning, Daily Standups, Sprint Reviews, Retrospectives).

Amadeus

Sophia Antipolis, France

Amadeus

Sophia Antipolis, France

Scrum Master & Technical Delivery Lead

January 2016 – June 2016

- **AI**, ensuring technical feasibility and timely delivery across major hospitality feature releases.
- **AI**, resolving cross-system dependencies, unblocking integration bottlenecks, and reducing delivery lead time.
- **AI** building Property Management System (PMS) integrations, CRS connectivity, brand configurations, and vendor profiles.

Capgemini

Sophia Antipolis, France

Capgemini

Sophia Antipolis, France

Software Engineering Lead & IT Consultant

October 2013 – December 2015

- **AI** for field technicians and administrators, while providing hands-on training on TDD and continuous integration practices.
- **AI**, designing and implementing automated CI/CD pipelines and architectural modernization for a facility management intervention system (mobile app + admin portal).
- **AI**, structuring architectural scoping and delivery estimates for enterprise client proposals.

CERTIFICATIONS & EXECUTIVE EDUCATION

Professional Certifications (Obtained)

-  — Facilitating Growth in Agile Teams
-  — AI for Product Management
-  — Generative AI for Business with Microsoft Azure OpenAI
-  — Certified Professional in Agile Team Facilitation (ICP-ATF)
-  — Certified Professional in Agile Coaching (ICP-ACC)
-  — Certified OKR Foundation

Executive Education & AI Governance (Planned / In Progress)

-  — FinOps Certified Practitioner (FOCP) *(In Progress)*
-  — RNCP 37630 Bloc 2: Management de Projet & Transformation *(Planned)*
-  — Certified Artificial Intelligence Governance Professional (AIGP) *(In Progress)*

EDUCATION

-  | IAE Lyon | 2012–2013
-  | INSA Toulouse / ENSA Marrakech | 2007–2012

TECHNICAL & TOOLING ECOSYSTEM

- : Atlassian Rovo Platform, Claude Code Co-Pilots, Spec-Driven Development (SDD), Prompt Engineering, EU AI Act Risk Governance, Responsible AI Guardrails, Azure AI Foundry
- : Jira Cloud Administration, Alignify (Custom Jira App), Confluence, Miro, Planview, TeamCity, Octopus, Jenkins, Bitbucket, GitLab
- : .NET Core, C#, Web API, REST APIs, Python, Vue.js, JavaScript, HTML5, CSS3, AWS (EC2, S3, Lambda), Docker, CI/CD Automation
- : SAFE, LeSS, Spotify Model, Scrum of Scrums, Scrum, Kanban, XP, OKRs, Value Stream Mapping, BDD, TDD, Clean Architecture, Hexagonal Architecture

LANGUAGES & COMMUNITY

- : French (Bilingual / Native), Arabic (Bilingual / Native), English (Fluent - TOEIC & Edinburgh Business English Certified)
- : Agile Playground Meetups; Coding Dojo Organizer (Sophia Antipolis, 2014–2019); IAE Lyon Alumni Network; Football (Jeux de Sophia League), Swimming, Ping Pong
